La manifattura di questo prodotto è stata realizzata con procedimenti artigianali e non industriali.

Piccole imperfezioni, avvallamenti ed increspature della superficie sono volutamente presenti costituendone specifica caratteristica del prodotto e ne testimoniano la speciale manifattura artigianale.

Istruzioni per la Posa:

Poiché il vetro sul prodotto determina un effetto craquelé, occorre una particolare attenzione nella posa del materiale.

Non sporcare la superficie con materiali solidi o liquidi (es. pennarelli od inchiostro) poiché le macchie potrebbero penetrare in profondità. Per ragioni di pulizia si consiglia un taglio a secco.

La pulizia deve essere effettuata con detergenti non aggressivi (no acids). (Es. Litokol LITONET GEL).

È comunque raccomandata una pulizia immediata e efficiente se si taglia ad acqua.

Contestazioni dovute alla mancanza di attenzione durante la posa non possono essere accettate.

Manufacturing of this product has been realized with hand crafted procedures and not industrial.

Small imperfections, subsidence and ripples of the surface are deliberately present and they are a feature of the product, proving the hand-made manufacturing procedure.

Fixing instructions :

The vitreous surface produces craquelé effects : a certain care shall therefore be taken when laying this material.

Don't use anything solid or liquid on the surface of the tiles (marker, ink, etc.) because the stains may penetrate the surface of the tiles.

For a better cleaning we advise dry cut.

Final cleaning shall be done with non aggressive detergents (no acids).

(Ex. Litokol LITONET GEL).

Should be a "water" cut anyway used, we highly recommend to clean the surface immediately.

Complains due to a layout careless or fixing mistakes will not be accepted at all.
